Description

From The Manufacturer

A safe alternative to Dry-Fire training

Ninja Blueguns are used in training classrooms and venues all over the country. They have excellent detail. These are a great way to help students learn grip and stance without having a live firearm in their hands. Blueguns are a great way for instructors to demonstrate techniques in the classroom and on the range. Blueguns are a great way to practice dissecting a firearm from a concealed holster without having to go through the hassle of unloading a firearm.

Blueguns are very popular in the holster making industry as well. The attention to detail makes these "firearm simulators" a great tool for forming perfect molding leather, and thermoplastic holsters. We have sold these Blueguns to holster manufacturers all over the country.

From the Manufacturer

Americas recently created a new contract with Ninja Manufacturing Inc. (BLUEMAKER) to manufacture Airsoft Blueguns as we have been doing for the past 4+ years. This new contract makes Americas exclusive to the sale of Airsoft Blueguns to the public. We are restricted selling Airsoft Blueguns to the public. We are restricted selling Airsoft Blueguns to the public. Military, Veterans, police distributors, or holster manufacturers. We ask that our customers politely by these rules and refrain from offering Airsoft Blueguns to the public on the Internet, publications or genuine catalogs. We apologize for the inconvenience and appreciate your support.

If you are an Holster manufacturer, we can sell the Airsoft Blueguns to you. We ask you to help us adhere to this policy. Email us your request to This email address is being protected from spambots. You need JavaScript enabled to view it. We will make the needed arrangements to allow you to purchase the Airsoft Blueguns.
