Description

From the Manufacturer

A safe alternative to live firearm training

Blueguns are the industry standard for realistic, yet safe, simulated, armorers, and protection-free of "Firearm Simulations" on the market today. All of our products are inert detailed replicas of actual weapons designed for use in Enforcement and Military Training

Each product is made with strong, impact-resistant polyurethane with steel reinforcement. This prevents bending and flexing while maintaining the detail, handling and balance of the actual weapon they represent

Each gun is distributed in "Law Enforcement Blue" - the most recognized safety color

If they look real to "the bad guys", it will work to your advantage in many live firearms training situations.

Simply Blueguns are used in training classrooms and ranges all over the country. They have excellent detail. These are a great way to help students learn grip and stance without having a live firearm in their hands. Blueguns are a great way for instructors to demonstrate techniques in the classroom and on the range. Blueguns are a great way to practice drawing a firearm from a concealed holster without having to go through the hassle of unloading a firearm

Blueguns are very popular in the holster making industry as well. The attention to detail makes these "firearm simulations" a great tool for training and creating leather- and fiberglass holsters. We have sold these Blueguns to holster manufacturers all over the country.

From the Manufacturer

[Insert text recently [name a local firearm will thing] manufacturing for. [Briefly] try to manufacture hand Blueguns as we have been doing for the past 10 years. We have chosen these Rhinoceros brand to be one of each Blueguns to my public. We can manufacture using internal blueguns to my store, [library, museum, police department, or holster manufacturer]. We ask that non-commercial [name] to the public on the internet, [collaborations or general meeting]. We apologize for the inconvenience and appreciate your support.

If you are an [retailer], an holster manufacturer, we can sell the [some Blueguns to you. We ask you to help us adhere to this policy.
