Description

The Taser X26 is a non-lethal weapon that is designed to incapacitate a suspect by delivering a high-voltage, low-amperage electrical shock. The Taser X26 is a compact, lightweight device that is easy to carry and use. It features a camera lens on the side, which allows the user to capture a video recording of the incident. The Taser X26 is also equipped with a safety switch that can be used to turn the device on or off. The Taser X26 is a reliable and effective tool for law enforcement and security personnel.
